Concept

Our vision was to provide a landmark for contemporary living with aspects of sustainability and a green and colourful vibe. The towers will be an identity giving a great standing position in the urban context for this upcoming socio-economic quarter and the bespoke apartments will cater to the needs of the cosmopolitan inhabitants. What is most important for us is that the spaces will be not only highly functional and efficient but also happy, open, well-lit and take advantage of the amazing views that the location has to offer.

A colour was added to give a vibrancy in the dialogue between the elegant horizontal white lines and the natural greens growing and hanging over. This also gives a sense of recognition and visual connection to the users. The horizontal bands give a strong structure to the building with an elegant feel where planters are added and balconies pop out which also gives an additional advantage of shading of the outer wall of the apartments.

Architecture

The development is a composition of 2 towers measuring 117m connected by 6 bridges. The vertical green which is integrated in the façade adds a positive vibe not only in the urban context to the building as a strong standing landmark, but also to the user with direct usage not only of the amazing views but also the greens which are wrapping this building. In each of the towers the ground and first floor are for common spaces and amenities, and floors above this are a mix of 1, 2 and 3 bedroom apartments for a vivid combination of singles, couples, and everyone can find something according to their needs.

The bridges between the buildings and the whole roof top terraces are valuable additional green spill out spaces made accessible to all users. The area of the green bridges will connect the two towers like a green joint thus providing a visual delight to the passers-by.
